

MUTUAL FUNDS

John Hancock Balanced Fund

SUBADVISED BY JOHN HANCOCK ASSET MANAGEMENT

Goal: Seeks current income, long-term growth of capital and income, and preservation of capital.

Strategy: Allocates its investments among a diversified mix of debt and equity securities. The managers look for equity securities that appear to be undervalued compared to their historical valuations. Debt securities are used to enhance current income and provide added stability.

MORNINGSTAR STYLE BOX¹

MORNINGSTAR RATING™ (CLASS A)

Overall rating

(out of 843 Moderate Allocation funds)

The Fund was rated 1 stars, 4 stars and 3 stars for the 3-, 5- and 10-year periods, respectively.

Load-waived rating

(out of 843 Moderate Allocation funds)

The Fund was rated 3 stars, 5 stars and 4 stars for the 3-, 5- and 10-year periods, respectively.

Overall rating is based on 3-, 5- and 10-year Morningstar Risk-Adjusted Returns and accounts for variation in a fund's monthly performance. The Fund was rated out of 843, 736 and 393 funds for the 3-, 5- and 10-year periods, respectively. The overall rating includes effects of sales charges, loads and redemption fees, while the load-waived rating does not. **Load-waived ratings for Class A shares should only be considered by investors who are not subject to a front-end sales charge.** Contact your financial professional to determine whether you are eligible to purchase the Class A share without paying the front load. Other share classes may be rated differently.*

AVERAGE ANNUAL TOTAL RETURNS

Without maximum sales charge	1-year	3-year	5-year	10-year	Life of Fund (10/5/92)
Class A	-3.23%	10.16%	4.24%	5.07%	6.48%
S&P 500 Index ²	2.11%	14.11%	-0.25%	2.92%	8.13%
Barclays Capital U.S. Aggregate Bond Index ²	7.84%	6.77%	6.50%	5.78%	6.36%
Morningstar Moderate Allocation Average	-0.11%	11.54%	1.33%	3.93%	6.43%

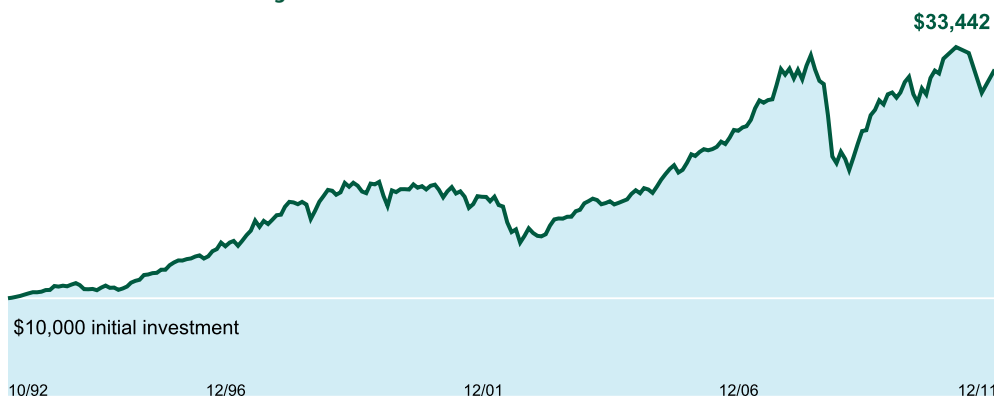

With 5% maximum sales charge	1-year	3-year	5-year	10-year	Life of Fund (10/5/92)
Class A	-8.09%	8.31%	3.18%	4.53%	6.19%

The Fund's total annual operating expense ratio as of the current prospectus is 1.21%. Expenses for other share classes will vary, which will affect returns. Performance figures assume that all distributions are reinvested. Performance quoted without sales charges would be reduced if the sales charges were applied.

For performance data current to the most recent month end, contact your financial professional or call John Hancock Funds at 1-800-225-5291. The performance data contained within this material represents past performance, which does not guarantee future results. The return and principal value of an investment will fluctuate, so that shares, when redeemed, may be worth more or less than the original cost. The Fund's current performance may be higher or lower and is subject to substantial changes.

GROWTH OF A HYPOTHETICAL \$10,000 INVESTMENT

WHAT YOU SHOULD KNOW BEFORE INVESTING

The value of a company's equity securities is subject to changes in the company's financial condition, and overall market and economic conditions. Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if the creditor is unable or unwilling to make principal or interest payments. Investments in higher-yielding, lower-rated securities involve additional risks as these securities include a higher risk of default and loss of principal. Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. Mortgage and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk and their value may fluctuate in response to the market's perception of issuer creditworthiness. The use of hedging and derivatives transactions could produce disproportionate gains or losses and may increase volatility and costs. The distribution rate and income amounts reflect past amounts distributed and may not be indicative of future rates or income amounts. Distribution rates and income amounts can change at any time. For additional information on these and other risk considerations, please see the Fund's prospectus.

A fund's investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information about the Fund. To obtain a prospectus, contact your financial professional, call John Hancock Funds at 1-800-225-5291 or visit our Web site at www.jhfunds.com. Please read the prospectus carefully before investing or sending money.

³ Listed holdings do not represent all of the holdings in the Fund. Holdings are subject to change at any time and are not recommendations to buy or sell any security. Characteristics are expressed as a percentage of net assets and exclude cash and cash equivalents.

⁴ The portfolio turnover is from the Fund's most current annual report and is subject to change. Please see the annual report for further details regarding the turnover ratio.

⁵ Source: Morningstar, Inc. Beta is the market risk of the Fund's Class A shares and is based on 3-year performance as of 12/31/11. By definition, the beta of the market (as represented by the stated benchmark) is 1.00. Accordingly, a fund with a 1.10 beta is theoretically expected to have 10% more volatility than the market.

⁶ Source: Morningstar, Inc. Based on Class A shares at NAV for the 3-year period as of 12/31/11. Standard deviation measures performance fluctuation — generally, the higher the standard deviation, the greater the expected volatility of returns. These measures of past risk are not completely or necessarily representative of future risk and cannot predict a fund's performance.

* For each fund with at least a 3-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return that accounts for variation in a fund's monthly performance (including effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category, the next 22.5%, 35%, 22.5% and the bottom 10% receive 5, 4, 3, 2 or 1 star(s), respectively. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Past performance is no guarantee of future results.
