I ■ TIUSX

ALL DATA AS OF 12/31/11

MORNINGSTAR STYLE BOX¹

AVERAGE ANNUAL TOTAL RETURNS²

	1-year	3-year	5-year	10-year	Life of Fund (12/31/91)
Without maximum sales charge					
Class A	5.51%	11.44%	6.36%	5.54%	5.72%
Barclays Capital U.S. Aggregate Bond Index ³	7.84%	6.77%	6.50%	5.78%	6.50%
With 4.5% maximum sales charge					
Class A	0.79%	9.73%	5.39%	5.05%	5.48%

The Fund's net annual operating expense ratio as of the current prospectus is 0.98%. The gross annual operating expense ratio of 1.00% is reduced due to a contractual expense reimbursement, which is in effect until at least 9/30/12 and may be terminated by the Adviser any time after this date. Expenses for other share classes will vary, which will affect returns. Performance figures assume that all distributions are reinvested. Performance quoted without sales charges would be reduced if the sales charges were applied.

For performance data current to the most recent month end, contact your financial professional or call John Hancock Funds at 1-800-225-5291. The performance data contained within this material represents past performance, which does not guarantee future results. The return and principal value of an investment will fluctuate, so that shares, when redeemed, may be worth more or less than the original cost. The Fund's current performance may be higher or lower and is subject to substantial changes.

GROWTH OF A HYPOTHETICAL \$10,000 INVESTMENT²

Class A without sales charge — 12/31/91 to 12/31/11

YEAR-BY-YEAR TOTAL RETURNS² (%) — CLASS A WITHOUT SALES CHARGE

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
9.61	4.62	3.60	1.59	4.37	5.33	-6.63	19.16	10.08	5.51

1 The Morningstar Style Box reveals the Fund's investment style. For fixed-income funds, the vertical axis shows the credit quality of the bonds and the horizontal axis shows interest-rate sensitivity, as measured by average effective duration. Credit quality is "low" if the average credit rating is less than BBB-, "medium" if between AA- and BBB-, or "high" if greater than AA-. Interest-rate sensitivity is "limited" if average effective duration falls below 75% of the duration of the Morningstar Core Bond Index, "moderate" if between 75% and 125%, and "extensive" if above 125%.

2 Performance results reflect any expense reductions. Without these reductions, performance would have been less favorable.

3 The Barclays Capital U.S. Aggregate Bond Index is comprised of government securities, mortgage-backed securities, asset-backed securities and corporate securities to simulate the universe of bonds in the market. It is not possible to invest directly in an index.

Q4 | 2011

Why John Hancock Funds?

► Extensive Research, Proven Managers

Our investment team conducts ongoing research to identify proven managers who have specialized expertise in their respective asset class or strategy and who meet our requirements for performance, style consistency and risk management. As a result, we give you access to an impressive roster of institutional asset managers not typically available to retail investors.

► A Focus on Your Success

We are committed to you and your success. Our ultimate objective is to help you achieve your long-term financial goals.

► A Brand You Know and Trust

John Hancock has been helping individuals and institutions build and protect wealth since 1862. At a time when trust and confidence are at a premium, we are proud to offer a full range of investment strategies that carry one of America's strongest and most recognized corporate brands.

John Hancock Investment Grade Bond Fund

KEY FACTS

- ▶ John Hancock Asset Management has provided investment advisory services for over 25 years, with expertise in global equity and global fixed-income investing.

Utilities	2.21%

WHAT YOU SHOULD KNOW BEFORE INVESTING

Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if the creditor is unable or unwilling to make principal or interest payments. Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. Mortgage and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk and their value may fluctuate in response to the market's perception of issuer creditworthiness. Hedging and other strategic transactions may increase the volatility of a fund and, if the transaction is not successful, could result in a significant loss. The distribution rate and income amounts reflect past amounts distributed and may not be indicative of future rates or income amounts. Distribution rates and income amounts can change at any time. For additional information on these and other risk considerations, please see the Fund's prospectus.

A fund's investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information about the Fund. To obtain a prospectus, contact your financial professional, call John Hancock Funds at 1-800-225-5291 or visit our Web site at www.jhfunds.com. Please read the prospectus carefully before investing or sending money.

KEY STATISTICS

Class A Inception	12/31/91
Total net assets (mil)	\$200.8
Portfolio turnover ⁵	105%
Number of holdings	390

FIXED INCOME CHARACTERISTICS

Average maturity	7.91 yrs
Duration	4.61 yrs
SEC 30-day yield ⁶	3.79%

Visit us at www.jhfunds.com

4 Listed holdings do not represent all of the holdings in the Fund. Holdings are subject to change at any time and are not recommendations to buy or sell any security. Characteristics are expressed as a percentage of net assets and exclude cash and cash equivalents.

5 The portfolio turnover is from the Fund's most current annual report and is subject to change. Please see the annual report for further details regarding the turnover ratio.

6 The Fund's unsubsidized yield as of 12/31/11 was 3.71%. Unsubsidized yields reflect what the yield would have been without the effect of reimbursements and waivers.
