Fund summary

John Hancock

Investment Grade Bond Fund

Day-to-day investment management: MFC Global Investment Management (U.S.), LLC

Class / Ticker A / TAUSX B / TSUSX C / TCUSX

Goal and strategy

To seek a high level of current income consistent with preservation of capital and maintenance of liquidity.

Under normal market conditions, the fund invests at least 80% of its net assets (plus any borrowing for investment purposes) in investment-grade bonds (securities rated from AAA to BBB). These may include, but are not limited to, corporate bonds and debentures, as well as U.S. government and agency securities. Although the fund may invest in bonds of any maturity, it maintains a dollar-weighted average maturity of between three and ten years.

In managing the fund's portfolio, the subadviser concentrates on sector allocation, industry allocation and securities selection, deciding which types of bonds and industries to emphasize at a given time, and then which individual bonds to buy. When making sector and industry allocations, the subadviser tries to anticipate shifts in the business cycle using top-down analysis to determine which sectors and industries may benefit over the next 12 months.

Main risks

An investment in the fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's shares will go up and down in price, meaning that you could lose money by investing in the fund. Many factors influence a mutual fund's performance.

Instability in the financial markets has led the United States government to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility and, in some cases, a lack of liquidity. Federal, state and other governments, their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the instruments in which the fund invests, or the issuers of such instruments, in ways that are unforeseeable. Legislation or regulation may also change the way in which the fund itself is regulated. Such legislation or regulation could limit or preclude the fund's ability to achieve its goal.

Governments or their agencies may also acquire distressed assets from financial institutions and acquire ownership interests in those institutions. The implications of government ownership and disposition of these assets are unclear, and such a program may have positive or negative effects on the liquidity, valuation and performance of the fund's portfolio holdings. Furthermore, volatile financial markets can expose the fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held by the fund.

In choosing individual securities, the subadviser uses bottom-up research to find securities that appear comparatively undervalued. The subadviser looks at bonds of many different issuers, potentially including U.S. dollar-denominated securities of foreign governments and corporations.

The fund may invest in mortgage-related securities and certain other derivatives (investments whose value is based on indexes or other securities). The fund's investments in U.S. government and agency securities may or may not be supported by the full faith and credit of the United States.

In abnormal circumstances, the fund may temporarily invest extensively in investment-grade short-term securities. In these and other cases, the fund might not achieve its goal.

The fund has traded securities actively in the past and may continue to do so, which could increase its transaction costs (thus lowering performance) and increase your taxable distributions.

The fund's main risk factors are listed below in alphabetical order. *Before investing, be sure to read the additional descriptions of these risks beginning on page 5.*

Active management risk The subadviser's investment strategy may fail to produce the intended result.

Changing distribution levels risk The amount of the distributions paid by the fund generally depends on the amount of income and/or dividends received by the fund on the securities it holds.

Credit and counterparty risk The issuer or guarantor of a fixed-income security, the counterparty to an over-the-counter derivatives contract or a borrower of a fund's securities, may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise to honor its obligations. U.S. government securities are subject to varying degrees of credit risk depending upon the nature of their support.

Fixed-income securities risk Fixed-income securities are affected by changes in interest rates and credit quality. A rise in interest rates typically causes bond prices to fall. The longer the average maturity of the bonds held by the fund, the more sensitive the fund is likely to be to interest rate changes. There is the possibility that the issuer of the security will not repay all or a portion of the principal borrowed and will not make all interest payments.

Foreign securities risk As compared to U.S. companies, there may be less publicly available information relating to foreign companies. Foreign securities may be subject to foreign taxes. The value of

foreign securities is subject to currency fluctuations and adverse political and economic developments.

Hedging, derivatives and other strategic transactions risk

Hedging and other strategic transactions may increase the volatility of a fund and, if the transaction is not successful, could result in a significant loss to a fund. In addition, the use of derivative instruments (such as options, futures and swaps) could produce disproportionate gains or losses, more than the principal amount invested. Investing in derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments and, in a down market, could become harder to value or sell at a fair price.

High portfolio turnover risk Actively trading securities can increase transaction costs (thus lowering performance) and taxable distributions.

Mortgage-backed and asset-backed securities risk Different types of mortgage-backed securities and asset-backed securities are subject to different combinations of prepayment, extension, interest rate and/or other market risks.

Past performance

Calendar year total returns – Class A (%)									
Best quarter: Q3 '01, 5.07			Worst quarter: Q4 '08, -3.35			Year-to-date as of 6-30-09: 7.90			
1999	2000	2001	2002	2003	2004	2005	2006	2007	2008
-1.06	11.02	7.23	9.61	4.62	3.60	1.59	4.37	5.33	-6.63

Average annual total returns (%)	1 Year	5 Year	10 Year	Inception
as of 12-31-08				4-1-99
Class A before tax	-10.82	0.62	3.37	—

Class B before tax	-11.75	0.47	3.24	—
Class C before tax	-8.21	0.80	—	3.30
Barclays Capital U.S. Aggregate Bond Index	5.24	4.65	5.63	5.85

Investor costs

Shareholder transaction expenses ¹ (%)	Class A	Class B	Class C
Maximum front-end sales charge (load) on purchases as a % of purchase price	4.50	—	—
Maximum deferred sales charge (load) as a % of purchase or sale price, whichever is less	— ²	5.00	1.00
Annual operating expenses (%)	Class A	Class B	Class C
Management fee	0.40	0.40	0.40
Distribution and service (12b-1) fees	0.25	1.00	1.00
Other expenses ^{3,4}	0.49	0.49	0.49
Total fund operating expenses⁵	1.14	1.89	1.89

Expense example

Please see below a hypothetical example showing the expenses of a \$10,000 investment during the various time frames indicated. The example assumes a 5% average annual return, and the reinvestment of all dividends. The example assumes fund expenses will not change over the periods. The example is for comparison only and does not reflect actual expenses and returns, either past or future.

Expenses (\$)	Class A		Class B		Class C	
	Sold	Kept	Sold	Kept	Sold	Kept
Shares						
1 Year	561	561	692	192	292	192
3 Years	796	796	894	594	594	594
5 Years	1,049	1,049	1,221	1,021	1,021	1,021
10 Years	1,774	1,774	2,016 ⁶	2,016 ⁶	2,212	2,212

Calendar year total returns

These do not include sales charges and would have been lower if they did. Calendar year total returns are shown only for Class A and would be different for other share classes. Fund returns vary from year to year and may indicate the fund's level of volatility; however, as always, past performance (before and after taxes) does not indicate future results. All figures assume dividend reinvestment.

Average annual total returns

These include sales charges. Performance of a broad-based securities market index is included for comparison purposes and may provide information regarding the fund's risks. Indexes do not have sales charges and you cannot invest in them directly. All figures assume dividend reinvestment.

After-tax returns These are shown only for Class A and would be different for other classes. They reflect the highest individual federal marginal income tax rates in effect as of the date provided and do not reflect any state or local taxes. Your actual after-tax returns may be different. After-tax returns are not relevant to shares held in an IRA, 401(k) or other tax-advantaged investment plan.

Barclays Capital U.S. Aggregate Bond Index is an unmanaged index of dollar-denominated and nonconvertible investment-grade debt issues.

Annual operating expenses

These are paid from the fund's assets; shareholders, therefore, pay these costs indirectly.

- A \$4.00 fee will be charged for wire redemptions.
- Except for investments of \$1 million or more; see "How sales charges are calculated."
- "Other Expenses" reflect a reduction in the contractual custody agreement.
- "Other expenses" shown exclude 0.04% of one-time extraordinary fees incurred in the prior fiscal year.
- Expenses for the current fiscal year may be higher than those shown in the "Annual operating expenses" table for one or more of the following reasons: (i) a significant decrease in average net assets may result in a higher advisory fee rate if advisory fee breakpoints are not achieved; (ii) a significant decrease in average net assets may result in an increase in the expense ratio because certain fund expenses do not decrease as asset levels decrease; (iii) fees may be incurred for extraordinary events such as proxy or fund tax expenses, or (iv) the termination of voluntary expense cap reimbursements and/or fee waivers, as applicable.
- Reflects conversion of Class B shares to Class A shares, which have a lower expense ratio, after eight years.

Fund details

Risks of investing

Below are descriptions of the main factors that may play a role in shaping the fund's overall risk profile. The descriptions appear in alphabetical order, not in order of importance. For further details about fund risks, including additional risk factors that are not discussed in this prospectus because they are not considered primary factors, see the fund's Statement of Additional Information (SAI).

Active management risk

A fund is subject to management risk because it relies on the subadviser's ability to pursue the fund's goal. The subadviser will apply investment techniques and risk analyses in making investment decisions for the fund, but there can be no guarantee that these will produce the desired results. The fund generally does not attempt to time the market and instead generally stays fully invested in the relevant asset class, such as domestic equities or foreign equities. Notwithstanding its benchmark, the fund may buy securities not included in its benchmark or hold securities in very different proportions than its benchmark. To the extent the fund invests in those securities, its performance depends on the ability of the subadviser to choose securities that perform better than securities that are included in the benchmark.

Changing distribution levels risk

The amount of the distributions paid by the fund generally depends on the amount of income and/or dividends received by the fund on the securities it holds. The fund may not be able to pay distributions or may have to reduce its distribution level if the income and/or dividends the fund receives from its investments decline.

Credit and counterparty risk

This is the risk that the issuer or guarantor of a fixed-income security, the counterparty to an over-the-counter (OTC) derivatives contract (see "Hedging, derivatives and other strategic transactions risk") or a borrower of a fund's securities will be unable or unwilling to make timely principal, interest or settlement payments, or otherwise to honor its obligations. Credit risk associated with investments in fixed-income securities relates to the ability of the issuer to make scheduled payments of principal and interest on an obligation. A fund that invests in fixed-income securities is subject to varying degrees of risk that the issuers of the securities will have their credit ratings downgraded or will default, potentially reducing the fund's share price and income level. Nearly all fixed-income securities are subject to some credit risk, which may vary depending upon whether the issuers of the securities are corporations, domestic or foreign governments, or their sub-divisions or instrumentalities. U.S. government securities are subject to varying degrees of credit risk depending upon whether the securities are supported by the full faith and credit of the United States, supported by the ability to borrow from the U.S. Treasury, supported only by the credit of the issuing U.S. government agency, instrumentality, corporation or otherwise supported by the United States. For example, issuers of many types of U.S. government securities (e.g., the Federal Home Loan Mortgage Corporation (Freddie Mac), Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Banks), although chartered or sponsored by Congress, are not funded by Congressional appropriations, and their fixed-income securities, including asset-backed and mortgage-backed securities, are neither guaranteed nor insured by the U.S. government. An agency of the U.S. government has placed Fannie Mae and Freddie

Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac. As a result, these securities are subject to more credit risk than U.S. government securities that are supported by the full faith and credit of the United States (e.g., U.S. Treasury bonds). When a fixed-income security is not rated, a subadviser may have to assess the risk of the security itself. Asset-backed securities, whose principal and interest payments are supported by pools of other assets, such as credit card receivables and automobile loans, are subject to further risks, including the risk that the obligors of the underlying assets default on payment of those assets.

Funds that invest in below investment-grade securities (also called junk bonds), which are fixed-income securities rated "Ba" or lower by Moody's or "BB" or lower by Standard & Poor's (S&P), or determined by a subadviser to be of comparable quality to securities so rated, are subject to increased credit risk. The sovereign debt of many foreign governments, including their sub-divisions and instrumentalities, falls into this category. Below investment-grade securities offer the potential for higher investment returns than higher-rated securities, but they carry greater credit risk: their issuers' continuing ability to meet principal and interest payments is considered speculative, and they are more susceptible to real or perceived adverse economic and competitive industry conditions, and may be less liquid than higher-rated securities.

In addition, a fund is exposed to credit risk to the extent it makes use of OTC derivatives (such as forward foreign currency contracts and/or swap contracts) and engages to a significant extent in the lending of fund securities or the use of repurchase agreements. OTC derivatives transactions can only be closed out with the other party to the transaction. If the counterparty defaults, a fund will have contractual remedies, but there is no assurance that the counterparty will be able to meet its contractual obligations or that, in the event of default, a fund will succeed in enforcing them. A fund, therefore, assumes the risk that it may be unable to obtain payments owed to it under OTC derivatives contracts or that those payments may be delayed or made only after the fund has incurred the costs of litigation. While the subadviser intends to monitor the creditworthiness of contract counterparties, there can be no assurance that the counterparty will be in a position to meet its obligations, especially during unusually adverse market conditions.

Fixed-income securities risk

Fixed-income securities are generally subject to two principal types of risks: (a) interest rate risk and (b) credit quality risk.

Interest rate risk. Fixed-income securities are affected by changes in interest rates. When interest rates decline, the market value of the fixed-income securities generally can be expected to rise. Conversely, when interest rates rise, the market value of fixed-income securities generally can be expected to decline. The longer the duration or maturity of a fixed-income security, the more susceptible it is to interest rate risk.

Credit quality risk. Fixed-income securities are subject to the risk that the issuer of the security will not repay all or a portion of the principal borrowed and will not make all interest payments. If the credit quality of a fixed-income security deteriorates after a fund has purchased the security, the market value of the security may decrease and lead to a decrease in the value of the fund's investments. Funds that may invest

in lower-rated fixed-income securities, commonly referred to as “junk” securities, are riskier than funds that may invest in higher-rated fixed-income securities. Additional information on the risks of investing in investment-grade fixed-income securities in the lowest-rating category and lower-rated fixed-income securities is set forth below.

Investment-grade fixed-income securities in the lowest-rating category risk. Investment-grade fixed-income securities in the lowest-rating category (rated “Baa” by Moody’s or “BBB” by S&P and comparable unrated securities) involve a higher degree of risk than fixed-income securities in the higher-rating categories. While such securities are considered investment-grade quality and are deemed to have adequate capacity for payment of principal and interest, such securities lack outstanding investment characteristics and have speculative characteristics as well. For example, changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than is the case with higher-grade securities.

Lower-rated fixed-income securities risk and high-yield securities risk. Lower-rated fixed-income securities are defined as securities rated below investment grade (rated “Ba” and below by Moody’s, and “BB” and below by S&P) (also called junk bonds). The general risks of investing in these securities are as follows:

- **Risk to principal and income.** Investing in lower-rated fixed-income securities is considered speculative. While these securities generally provide greater income potential than investments in higher-rated securities, there is a greater risk that principal and interest payments will not be made. Issuers of these securities may even go into default or become bankrupt.
- **Price volatility.** The price of lower-rated fixed-income securities may be more volatile than securities in the higher-rating categories. This volatility may increase during periods of economic uncertainty or change. The price of these securities is affected more than higher-rated fixed-income securities by the market’s perception of their credit quality, especially during times of adverse publicity. In the past, economic downturns or an increase in interest rates have, at times, caused more defaults by issuers of these securities and may do so in the future. Economic downturns and increases in interest rates have an even greater affect on highly leveraged issuers of these securities.
- **Liquidity.** The market for lower-rated fixed-income securities may have more limited trading than the market for investment-grade fixed-income securities. Therefore, it may be more difficult to sell these securities, and these securities may have to be sold at prices below their market value in order to meet redemption requests or to respond to changes in market conditions.
- **Dependence on subadviser’s own credit analysis.** While a subadviser may rely on ratings by established credit-rating agencies, it will also supplement such ratings with its own independent review of the credit quality of the issuer. Therefore, the assessment of the credit risk of lower-rated fixed-income securities is more dependent on the subadviser’s evaluation than the assessment of the credit risk of higher-rated securities.

Additional risks regarding lower-rated corporate fixed-income securities. Lower-rated corporate debt securities (and comparable unrated securities) tend to be more sensitive to individual corporate developments and changes in economic conditions than higher-rated corporate fixed-income securities. Issuers of lower-rated corporate debt securities may also be highly leveraged, increasing the risk that principal and income will not be repaid.

Additional risks regarding lower-rated foreign government fixed-income securities. Lower-rated foreign government fixed-income securities are subject to the risks of investing in foreign countries described under “Foreign securities risk.” In addition, the ability and

willingness of a foreign government to make payments on debt when due may be affected by the prevailing economic and political conditions within the country. Emerging-market countries may experience high inflation, interest rates and unemployment, as well as exchange rate trade difficulties and political uncertainty or instability. These factors increase the risk that a foreign government will not make payments when due.

Prepayment of principal. Many types of debt securities, including floating-rate loans, are subject to prepayment risk. Prepayment risk occurs when the issuer of a security can repay principal prior to the security’s maturity. Securities subject to prepayment risk can offer less potential for gains when the credit quality of the issuer improves.

Foreign securities risk

Funds that invest in securities traded principally in securities markets outside the United States are subject to additional and more varied risks, as the value of foreign securities may change more rapidly and extremely than the value of U.S. securities. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Additionally, issuers of foreign securities may not be subject to the same degree of regulation as U.S. issuers. Reporting, accounting and auditing standards of foreign countries differ, in some cases significantly, from U.S. standards. There are generally higher commission rates on foreign portfolio transactions, transfer taxes, higher custodial costs and the possibility that foreign taxes will be charged on dividends and interest payable on foreign securities. In the event of nationalization, expropriation or other confiscation, a fund could lose its entire investment in a foreign security.

Hedging, derivatives and other strategic transactions risk

The ability of a fund to utilize hedging, derivatives and other strategic transactions successfully will depend in part on its subadviser’s ability to predict pertinent market movements and market risk, counterparty risk, credit risk, interest risk and other risk factors, none of which can be assured. The skills required to successfully utilize hedging and other strategic transactions are different from those needed to select a fund’s securities. Even if the subadviser only uses hedging and other strategic transactions in a fund primarily for hedging purposes or to gain exposure to a particular securities market, if the transaction is not successful, it could result in a significant loss to a fund. The amount of loss could be more than the principal amount invested. These transactions may also increase the volatility of a fund and may involve a small investment of cash relative to the magnitude of the risks assumed, thereby magnifying the impact of any resulting gain or loss. For example, the potential loss from the use of futures can exceed a fund’s initial investment in such contracts. In addition, these transactions could result in a loss to a fund if the counterparty to the transaction does not perform as promised.

A fund may invest in derivatives, which are financial contracts with a value that depends on, or is derived from, the value of underlying assets, reference rates or indexes. Examples of derivative instruments include options contracts, futures contracts, options on futures contracts and swap agreements (including, but not limited to, credit default swaps and swaps on exchange traded funds). Derivatives may relate to stocks, bonds, interest rates, currencies or currency exchange rates and related indexes. A fund may use derivatives for many purposes, including for hedging, and as a substitute for direct investment in securities or other assets. Derivatives may be used in a way to adjust efficiently the exposure of a fund to various securities, markets and currencies without a fund actually having to sell existing investments and make new investments. This generally will be done when the adjustment is expected to be relatively temporary or in anticipation of

effecting the sale of fund assets and making new investments over time. Further, since many derivatives have a leverage component, adverse changes in the value or level of the underlying asset, reference rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. When a fund uses derivatives for leverage, investments in that fund will tend to be more volatile, resulting in larger gains or losses in response to market changes. To limit leverage risk, a fund may segregate assets determined to be liquid or, as permitted by applicable regulation, enter into certain offsetting positions to cover its obligations under derivative instruments. For a description of the various derivative instruments the fund may utilize, refer to the SAI.

The use of derivative instruments may involve risks different from, or potentially greater than, the risks associated with investing directly in securities and other more traditional assets. In particular, the use of derivative instruments exposes a fund to the risk that the counterparty to an over-the-counter (OTC) derivatives contract will be unable or unwilling to make timely settlement payments or otherwise to honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction, although either party may engage in an offsetting transaction that puts that party in the same economic position as if it had closed out the transaction with the counterparty or may obtain the other party's consent to assign the transaction to a third party. If the counterparty defaults, the fund will have contractual remedies, but there is no assurance that the counterparty will meet its contractual obligations or that, in the event of default, the fund will succeed in enforcing them. For example, because the contract for each OTC derivatives transaction is individually negotiated with a specific counterparty, a fund is subject to the risk that a counterparty may interpret contractual terms (e.g., the definition of default) differently than the fund when the fund seeks to enforce its contractual rights. If that occurs, the cost and unpredictability of the legal proceedings required for the fund to enforce its contractual rights may lead it to decide not to pursue its claims against the counterparty. The fund, therefore, assumes the risk that it may be unable to obtain payments owed to it under OTC derivatives contracts or that those payments may be delayed or made only after the fund has incurred the costs of litigation. While a subadviser intends to monitor the creditworthiness of counterparties, there can be no assurance that a counterparty will meet its obligations, especially during unusually adverse market conditions. To the extent a fund contracts with a limited number of counterparties, the fund's risk will be concentrated and events that affect the creditworthiness of any of those counterparties may have a pronounced effect on the fund. Derivatives also are subject to a number of other risks, including market risk and liquidity risk. Since the value of derivatives is calculated and derived from the value of other assets, instruments or references, there is a risk that they will be improperly valued. Derivatives also involve the risk that changes in their value may not correlate perfectly with the assets, rates or indexes they are designed to hedge or closely track. Suitable derivative transactions may not be available in all circumstances. The fund is also subject to the risk that the counterparty closes out the derivatives transactions upon the occurrence of certain triggering events. In addition, a subadviser may determine not to use derivatives to hedge or otherwise reduce risk exposure. A detailed discussion of various hedging and other strategic transactions appears in the SAI. To the extent the fund utilizes hedging and other strategic transactions, it will be subject to the same risks.

High portfolio turnover risk

A high fund portfolio turnover rate (over 100%) generally involves correspondingly greater brokerage commission expenses, which must be borne directly by a fund. The portfolio turnover rate of a fund may vary from year to year, as well as within a year.

Mortgage-backed and asset-backed securities risk

Mortgage-backed securities. Mortgage-backed securities represent participating interests in pools of residential mortgage loans, which are guaranteed by the U.S. government, its agencies or instrumentalities. However, the guarantee of these types of securities relates to the principal and interest payments, and not the market value of such securities. In addition, the guarantee only relates to the mortgage-backed securities held by the fund and not the purchase of shares of the fund.

Mortgage-backed securities are issued by lenders, such as mortgage bankers, commercial banks, and savings and loan associations. Such securities differ from conventional debt securities, which provide for the periodic payment of interest in fixed amounts (usually semiannually) with principal payments at maturity or on specified dates. Mortgage-backed securities provide periodic payments which are, in effect, a "pass-through" of the interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans. A mortgage-backed security will mature when all the mortgages in the pool mature or are prepaid. Therefore, mortgage-backed securities do not have a fixed maturity, and their expected maturities may vary when interest rates rise or fall.

When interest rates fall, homeowners are more likely to prepay their mortgage loans. An increased rate of prepayments on the fund's mortgage-backed securities will result in an unforeseen loss of interest income to the fund as the fund may be required to reinvest assets at a lower interest rate. Because prepayments increase when interest rates fall, the prices of mortgaged-backed securities do not increase as much as other fixed-income securities when interest rates fall.

When interest rates rise, homeowners are less likely to prepay their mortgages loans. A decreased rate of prepayments lengthens the expected maturity of a mortgage-backed security. Therefore, the prices of mortgage-backed securities may decrease more than prices of other fixed-income securities when interest rates rise.

The yield of mortgage-backed securities is based on the average life of the underlying pool of mortgage loans. The actual life of any particular pool may be shortened by unscheduled or early payments of principal and interest. Principal prepayments may result from the sale of the underlying property, or the refinancing or foreclosure of underlying mortgages. The occurrence of prepayments is affected by a wide range of economic, demographic and social factors and, accordingly, it is not possible to accurately predict the average life of a particular pool. The actual prepayment experience of a pool of mortgage loans may cause the yield realized by the fund to differ from the yield calculated on the basis of the average life of the pool. In addition, if the fund purchases mortgage-backed securities at a premium, the premium may be lost in the event of early prepayment, which may result in a loss to the fund.

Prepayments tend to increase during periods of falling interest rates, while during periods of rising interest rates, prepayments are likely to decline. Monthly interest payments received by a fund have a compounding effect, which will increase the yield to shareholders as compared to debt obligations that pay interest semiannually. Because of the reinvestment of prepayments of principal at current rates, mortgage-backed securities may be less effective than Treasury bonds of similar maturity at maintaining yields during periods of declining interest rates. Also, although the value of debt securities may increase as interest rates decline, the value of these pass-through type of securities may not increase as much, due to their prepayment feature.

Collateralized mortgage obligations. A fund may invest in mortgage-backed securities called collateralized mortgage obligations (CMOs). CMOs are issued in separate classes with different stated maturities. As the mortgage pool experiences prepayments, the pool pays off investors in classes with shorter maturities first. By investing in

CMOs, a fund may manage the prepayment risk of mortgage-backed securities. However, prepayments may cause the actual maturity of a CMO to be substantially shorter than its stated maturity.

Asset-backed securities. Asset-backed securities include interests in pools of debt securities, commercial or consumer loans, or other receivables. The value of these securities depends on many factors, including changes in interest rates, the availability of information concerning the pool and its structure, the credit quality of the underlying assets, the market's perception of the servicer of the pool, and any credit enhancement provided. In addition, asset-backed securities have prepayment risks similar to mortgage-backed securities.

These investment strategies and securities are described further in the SAI.

Who's who

Below are the names of the various entities involved with the fund's investment and business operations, along with brief descriptions of the role each entity performs.

Trustees

Oversee the fund's business activities and retain the services of the various firms that carry out the fund's operations. The Board of Trustees can change the fund's investment goal and strategy without shareholder approval. The fund will provide written notice to shareholders at least 60 days prior to a change in its 80% investment policy.

Investment adviser

Manages the fund's business and investment activities.

John Hancock Advisers, LLC **601 Congress Street** **Boston, MA 02210-2805**

Founded in 1968, John Hancock Advisers, LLC is a wholly owned subsidiary of John Hancock Financial Services, Inc., which in turn is a subsidiary of Manulife Financial Corporation.

The adviser administers the business and affairs of the fund and retains and compensates the investment subadviser to manage the assets of the fund. As of June 30, 2009, the adviser had total assets under management of approximately \$18 billion.

The adviser does not itself manage any of the fund's portfolio assets but has ultimate responsibility to oversee the subadviser and recommend its hiring, termination and replacement. In this connection, the adviser: (i) monitors the compliance of the subadviser with the investment objectives and related policies of the fund, (ii) reviews the performance of the subadviser and (iii) reports periodically on such performance to the Board of Trustees.

The fund relies on an order from the SEC permitting the adviser, subject to Board approval, to appoint a subadviser or change the terms of a subadvisory agreement without obtaining shareholder approval. The fund, therefore, is able to change subadvisers or the fees paid to a subadviser from time to time without the expense and delays associated with obtaining shareholder approval of the change. This order does not, however, permit the adviser to appoint a subadviser that is an affiliate of the adviser or the fund (other than by reason of serving as a subadviser to a fund), or to increase the subadvisory fee of an affiliated subadviser, without the approval of the shareholders.

Management fee

The fund pays the adviser a management fee for its services to the fund. The fee is stated as an annual percentage of the current value of

the net assets of the fund determined in accordance with the following schedule, and that rate is applied to the average daily assets of the fund.

Average Daily Net Assets	Annual Rate
First \$1.5 billion	0.400%
Excess over \$1.5 billion	0.385%

During its most recent fiscal year, the fund paid to the investment adviser a management fee equal to 0.40% of net assets.

Out of these fees, the investment adviser in turn pays the fees of the subadviser.

The basis for the Trustees' approval of the advisory fees, and of the investment advisory agreement overall, including the subadvisory agreement, is discussed in the fund's May 31, 2009 annual shareholder report.

Subadviser

Handles the fund's day-to-day portfolio management.

MFC Global Investment Management (U.S.), LLC **101 Huntington Avenue** **Boston, MA 02199**

MFC Global Investment Management (U.S.), LLC (MFC Global (U.S.)) was founded in 1979 and provides investment advisory services to individual and institutional investors. MFC Global (U.S.) is a wholly owned subsidiary of John Hancock Financial Services, Inc. (a subsidiary of Manulife Financial Corporation) and, as of June 30, 2009, had total assets under management of approximately \$24 billion.

Below are brief biographical profiles of the leaders of the fund's investment management team, in alphabetical order. These managers share portfolio management responsibilities. For more about these individuals, including information about their compensation, other accounts they manage and any investments they may have in the fund, see the SAI.

Barry H. Evans, CFA

- Joined fund team in 1995
- President and chief fixed-income officer, MFC Global (U.S.) (since 2005)
- Senior vice president, chief fixed-income officer and chief operating officer, John Hancock Advisers, LLC (1986–2005)
- Began business career in 1986

Jeffrey N. Given, CFA

- Joined fund team in 1998
- Vice president, MFC Global (U.S.) (since 2005)
- Second vice president, John Hancock Advisers, LLC (1993–2005)
- Began business career in 1993

Howard C. Greene, CFA

- Joined fund team in 2003
- Senior vice president, MFC Global (U.S.) (since 2005)
- Senior vice president, John Hancock Advisers, LLC (2002–2005)
- Began business career in 1979

Custodian

Holds the fund's assets, settles all portfolio trades and collects most of the valuation data required for calculating the fund's net asset value (NAV).

State Street Bank and Trust Company
Lafayette Corporate Center
Two Avenue de Lafayette
Boston, MA 02111

Principal distributor

Markets the fund and distributes shares through selling brokers, financial planners and other financial representatives.

John Hancock Funds, LLC
601 Congress Street
Boston, MA 02210-2805

Transfer agent

Handles shareholder services, including recordkeeping and statements, distribution of dividends and processing of buy and sell requests.

John Hancock Signature Services, Inc.
P.O. Box 9510
Portsmouth, NH 03802-9510

Financial highlights

These tables detail the financial performance of each share class described in this prospectus, including total return information showing how much an investment in the fund has increased or decreased each year.

The financial statements of the fund as of May 31, 2009, have been audited by PricewaterhouseCoopers LLP (PwC), the fund's independent registered public accounting firm. The report of PwC is included, along with the fund's financial statements, in the fund's annual report, which has been incorporated by reference into the SAI and is available upon request.

1 Audited by previous Independent Registered Public Accounting Firm.

2 Based on the average of the shares outstanding.

3 Assumes dividend reinvestment and does not reflect the effect of sales charges.

4 Total returns would have been lower had certain expenses not been reduced during the periods shown.

5 Includes proxy fees. The impact of this expense to the gross and net expense ratios was 0.04%.

Choosing a share class

Each share class has its own cost structure, including a Rule 12b-1 plan that allows it to pay fees for the sale, distribution and service of its shares. Your financial representative can help you decide which share class is best for you.

Class A

- A front-end sales charge, as described in the section “How sales charges are calculated.”
- Distribution and service (Rule 12b-1) fees of 0.25%.

Class B

- No front-end sales charge; all your money goes to work right away for you.
- Distribution and service (Rule 12b-1) fees of 1.00%.
- A contingent deferred sales charge (CDSC), as described in the section “How sales charges are calculated.”
- Automatic conversion to Class A shares after eight years, thus reducing future annual expenses.

Class C

- No front-end sales charge; all your money goes to work right away for you.
- Distribution and service (Rule 12b-1) fees of 1.00%.
- A 1.00% CDSC on shares sold within one year of purchase.
- No automatic conversion to Class A shares, so annual expenses continue at the Class C level throughout the life of your investment.

The maximum amount you may invest in Class B shares with any single purchase request is \$99,999.99 and the maximum amount you may invest in Class C shares with any single purchase is \$999,999.99. John Hancock Signature Services, Inc. (Signature Services), the transfer agent for the fund, may accept a purchase request for Class B shares for \$100,000 or more, or for Class C shares for \$1,000,000 or more when the purchase is pursuant to the Reinstatement Privilege (see “Sales charge reductions and waivers”).

12b-1 fees

Rule 12b-1 fees will be paid to the fund's distributor, John Hancock Funds, LLC, and may be used by the distributor for expenses relating to the distribution of, and shareholder or administrative services for holders of, the shares of the class and for the payment of service fees that come within Rule 2830(d)(5) of the Conduct Rules of the Financial Industry Regulatory Authority (FINRA).

Because 12b-1 fees are paid out of the fund's assets on an ongoing basis, over time they will increase the cost of your investment and may cost shareholders more than other types of sales charges.

Other classes of shares of the fund, which have their own expense structure, may be offered in separate prospectuses.

Your broker-dealer or agent may charge you a fee to effect transactions in fund shares.

Additional payments to financial intermediaries

Shares of the fund are primarily sold through financial intermediaries, such as brokers, banks, registered investment advisers, financial planners and retirement plan administrators. These firms may be compensated for selling shares of the fund in two principal ways:

- directly, by the payment of sales commissions, if any; and
- indirectly, as a result of the fund paying Rule 12b-1 fees.

Certain firms may request, and the distributor may agree to make, payments in addition to sales commissions and 12b-1 fees out of the distributor's own resources. These additional payments are sometimes referred to as “revenue sharing.” These payments assist in the distributor's efforts to promote the sale of the fund's shares. The distributor agrees with the firm on the methods for calculating any additional compensation, which may include the level of sales or assets attributable to the firm. Not all firms receive additional compensation and the amount of compensation varies. These payments could be significant to a firm. The distributor determines which firms to support and the extent of the payments it is willing to make. The distributor generally chooses to compensate firms that have a strong capability to distribute shares of the fund and that are willing to cooperate with the distributor's promotional efforts.

The distributor hopes to benefit from revenue sharing by increasing the fund's net assets, which, as well as benefiting the fund, would result in additional management and other fees for the adviser and its affiliates. In consideration for revenue sharing, a firm may feature the fund in its sales system or give preferential access to members of its sales force or management. In addition, the firm may agree to participate in the distributor's marketing efforts by allowing the distributor or its affiliates to participate in conferences, seminars or other programs attended by the intermediary's sales force. Although an intermediary may seek revenue-sharing payments to offset costs incurred by the firm in servicing its clients who have invested in the fund, the intermediary may earn a profit on these payments. Revenue-sharing payments may provide your firm with an incentive to favor the fund.

The SAI discusses the distributor's revenue-sharing arrangements in more detail. Your intermediary may charge you additional fees other than those disclosed in this prospectus. You can ask your firm about any payments it receives from the distributor or the fund, as well as about fees and/or commissions it charges.

The distributor, adviser and their affiliates may have other relationships with your firm relating to the provisions of services to the fund, such as providing omnibus account services, transaction-processing services or effecting portfolio transactions for the fund. If your intermediary provides these services, the adviser or the fund may compensate the intermediary for these services. In addition, your intermediary may have other compensated relationships with the adviser or its affiliates that are not related to the fund.

Rollover program compensation

The broker-dealer of record for a pension, profit-sharing or other plan qualified under Section 401(a) or described in Section 457(b) of the Internal Revenue Code of 1986, as amended (the Code), that is funded by certain group annuity contracts issued by John Hancock insurance companies, is eligible to receive ongoing compensation (Rollover Compensation) when a plan participant terminates from the qualified plan and rolls over assets into a John Hancock-sponsored custodial IRA or a John Hancock custodial Roth IRA invested in shares of John

Hancock funds. The Rollover Compensation is paid from a fund's 12b-1 fees to the plan's broker-dealer of record at an annual rate not expected to exceed 0.25% of the average daily net eligible assets held in John Hancock funds (0.15% for the John Hancock Money Market Fund) under the rollover program. Rollover Compensation is made in the first year and continues thereafter, quarterly in arrears. A John Hancock insurance company may also pay the third-party administrator for the plan a one-time nominal fee not expected to exceed \$25 per participant rollover into a John Hancock fund for facilitating the transaction.

How sales charges are calculated

Class A sales charges are as follows:

Your investment	As a % of offering price*	As a % of your investment
Up to \$99,999	4.50%	4.71%
\$100,000 – \$249,999	3.75%	3.90%
\$250,000 – \$499,999	2.75%	2.83%
\$500,000 – \$999,999	2.00%	2.04%
\$1,000,000 and over	See below	

* Offering price is the net asset value per share plus any initial sales charge.

You may qualify for a reduced Class A sales charge if you own or are purchasing Class A, Class B, Class C, Class T, Class ADV, all Class R shares, Class I2 or Class I shares of a John Hancock open-end mutual fund. **To receive the reduced sales charge, you must tell your broker or financial representative at the time you purchase the fund's Class A shares about any other John Hancock mutual funds held by you, your spouse or your children under the age of 21 living in the same household.** This includes investments held in an individual retirement account or with a broker or financial representative other than the one handling your current purchase. John Hancock will credit the combined value, at the current offering price, of all eligible accounts to determine whether you qualify for a reduced sales charge on your current purchase. You may need to provide documentation for these accounts, such as an account statement. For more information about these reduced sales charges, you may visit the fund's Web site at www.jhfunds.com. You may also consult your broker or financial adviser, or refer to the section entitled "Initial sales charge on Class A shares" in the fund's SAI. You may request an SAI from your broker or financial adviser, by accessing the fund's Web site at www.jhfunds.com or by calling Signature Services at 1-800-225-5291.

Investments of \$1 million or more

Class A shares are available with no front-end sales charge on investments of \$1 million or more. There is a CDSC on any Class A shares upon which a commission or finder's fee was paid that are sold within one year of purchase, as follows:

Class A deferred charges on investments of \$1 million or more

Your investment	CDSC on shares being sold
First \$1M – \$4,999,999	1.00%
Next \$1 – \$5M above that	0.50%
Next \$1 or more above that	0.25%

For purposes of this CDSC, all purchases made during a calendar month are counted as having been made on the first day of that month.

The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. To keep your CDSC as low as possible, each time you place a request to sell shares we will first sell any shares in your account that are not subject to a CDSC.

Class B and Class C

Shares are offered at their net asset value per share, without any initial sales charge.

A CDSC may be charged if a commission has been paid and you sell Class B or Class C shares within a certain time after you bought them, as described in the tables below. There is no CDSC on shares acquired through reinvestment of dividends. The CDSC is based on the original purchase cost or the current market value of the shares being sold, whichever is less. The CDSCs are as follows:

Class B deferred charges

Years after purchase	CDSC
1 st year	5.00%
2 nd year	4.00%
3 rd or 4 th year	3.00%
5 th year	2.00%
6 th year	1.00%
After 6 th year	None

Class C deferred charges

Years after purchase	CDSC
1 st year	1.00%
After 1 st year	None

For purposes of these CDSCs, all purchases made during a calendar month are counted as having been made on the first day of that month.

To keep your CDSC as low as possible, each time you place a request to sell shares, we will first sell any shares in your account that carry no CDSC. If there are not enough of these shares to meet your request, we will sell those shares that have the lowest CDSC.

Sales charge reductions and waivers

Reducing your Class A sales charges

There are several ways you can combine multiple purchases of shares of John Hancock funds to take advantage of the breakpoints in the sales charge schedule. The first three ways can be combined in any manner.

- **Accumulation Privilege** — lets you add the value of any class of shares of any John Hancock open-end fund you already own to the amount of your next Class A investment for purposes of calculating the sales charge. However, Class A shares of money market funds will not qualify unless you have already paid a sales charge on those shares.
- **Letter of Intention** — lets you purchase Class A shares of a fund over a 13-month period and receive the same sales charge as if all shares had been purchased at once. You can use a Letter of Intention to qualify for reduced sales charges if you plan to invest at least \$100,000 in a fund's Class A and Class T shares during the next 13 months. The calculation of this amount would include accumulations and combinations as well as your current holdings of all classes of John Hancock funds, which include any reinvestment of dividends and capital gains distributions. However, Class A shares of money market funds will be excluded unless you have already paid a sales charge. When you sign this letter, the fund agrees to charge you the reduced sales charges. Completing a Letter of Intention does not obligate you to purchase additional shares. However, if you do not buy enough shares to qualify for the lower sales charges by the earlier of the end of the 13-month period or when you sell your shares, your sales charges will be recalculated to reflect your actual purchase level. Also available for individual retirement plan investors is a 48-month Letter of Intention, described in the SAI.

- Combination Privilege — lets you combine shares of all funds for purposes of calculating the Class A sales charge.

To utilize any reduction, you must complete the appropriate section of your application, or contact your financial representative or Signature Services. Consult the SAI for additional details (see the back cover of this prospectus).

Group investment program

A group may be treated as a single purchaser under the accumulation and combination privileges. Each investor has an individual account, but the group's investments are lumped together for sales charge purposes, making the investors potentially eligible for reduced sales charges. There is no charge or obligation to invest (although initial investments per account opened must satisfy minimum initial investment requirements specified in the section entitled "Opening an account"), and individual investors may close their accounts at any time.

To utilize this program, you must contact your financial representative or Signature Services to find out how to qualify. Consult the SAI for additional details (see the back cover of this prospectus).

CDSC waivers

As long as Signature Services is notified at the time you sell, the CDSC for each share class will be waived in the following cases:

- to make payments through certain systematic withdrawal plans
- certain retirement plans participating in Merrill Lynch, The Princeton Retirement Group, Inc. or PruSolutionsSM programs
- redemptions pursuant to the fund's right to liquidate an account less than the stated minimum in the section "Opening an account"
- redemptions of Class A shares made after one year from the inception of a retirement plan at John Hancock
- to make certain distributions from a retirement plan
- because of shareholder death or disability
- rollovers, contract exchanges or transfers of John Hancock custodial 403(b)(7) account assets required by John Hancock funds as a result of its decision to discontinue maintaining and administering 403(b)(7) accounts

To utilize a waiver, you must contact your financial representative or Signature Services. Consult the SAI for additional details (see the back cover of this prospectus).

Reinstatement privilege

If you sell shares of a John Hancock fund, you may reinvest some or all of the proceeds back into the same share class of the same fund and account from which it was removed, within 120 days without a sales charge, as long as Signature Services or your financial representative is notified before you reinvest. If you paid a CDSC when you sold your shares, you will be credited with the amount of the CDSC.

To utilize this privilege, you must contact your financial representative or Signature Services.

Waivers for certain investors

Class A shares may be offered without front-end sales charges or CDSCs to the following individuals and institutions:

- selling brokers and their employees and sales representatives (and their Immediate Family, as defined in the SAI)
- financial representatives utilizing fund shares in certain eligible retirement platforms, fee-based or wrap investment products under a signed agreement with the distributor

- fund trustees and other individuals who are affiliated with these or other John Hancock funds (and their Immediate Family, as defined in the SAI)
- individuals transferring assets held in a SIMPLE IRA, SEP or SAR-SEP invested in John Hancock funds directly to an IRA
- individuals converting assets held in an IRA, SIMPLE IRA, SEP or SAR-SEP invested in John Hancock funds directly to a Roth IRA
- individuals recharacterizing assets from an IRA, Roth IRA, SEP, SAR-SEP or SIMPLE IRA invested in John Hancock funds back to the original account type from which it was converted
- participants in certain 529 plans that have a signed agreement with the distributor (one-year CDSC may apply)
- participants in certain retirement plans with at least 100 eligible employees (one-year CDSC applies)
- certain retirement plans participating in Merrill Lynch, The Princeton Retirement Group, Inc. or PruSolutionsSM programs
- terminating participants rolling over (directly or within 60 days after distribution) assets held in a pension, profit sharing or other plan qualified under Section 401(a) of the Code, or described in Section 457(b) of the Code, that is funded by certain John Hancock group annuity contracts, to a John Hancock custodial IRA or John Hancock custodial Roth IRA that invests in John Hancock funds, including subsequent investments
- participants rolling over (directly or within 60 days after distribution) from a terminating pension, profit sharing or other plan qualified under Section 401(a) of the Code, or described in Section 457(b) of the Code (the assets of which, immediately prior to its termination, were held in certain John Hancock group annuity contracts but are now transferred from such contracts and held either: (i) in trust by a distribution processing organization; or (ii) in a custodial IRA or custodial Roth IRA sponsored by an authorized third party trust company and made available through John Hancock), to a John Hancock custodial IRA or John Hancock custodial Roth IRA that invests in John Hancock funds, including subsequent investments
- individuals rolling over assets held in a John Hancock custodial 403(b)(7) account into a John Hancock custodial IRA account

To utilize a waiver, you must contact your financial representative or Signature Services. Consult the SAI for additional details (see the back cover of this prospectus).

Other waivers

Front-end sales charges and CDSCs are not imposed in connection with the following transactions:

- exchanges from one John Hancock fund to the same class of any other John Hancock fund (see "Transaction policies" in this prospectus for additional details)
- dividend reinvestments (see "Dividends and account policies" in this prospectus for additional details)

Opening an account

- 1 Read this prospectus carefully.
- 2 Determine how much you want to invest. The minimum initial investment for the Class A, B and C shares of the fund is \$2,500 except as follows:
 - Coverdell ESAs: \$2,000
 - there is no minimum initial investment for certain group retirement plans using salary deduction or similar group methods of payment
 - group investments: \$250

- there is no minimum initial investment for fee-based or wrap accounts of selling firms that have executed a fee-based or wrap agreement with the distributor
- 3 All shareholders must complete the account application, carefully following the instructions. If you have any questions, contact your financial representative or call Signature Services at 1-800-225-5291.
 - 4 Complete the appropriate parts of the account privileges application. By applying for privileges now, you can avoid the delay and inconvenience of having to file an additional application if you want to add privileges later.
 - 5 Make your initial investment using the instructions under “Buying shares.” You and your financial representative can initiate any purchase, exchange or sale of shares.

Important information about opening a new account

To help the government fight the funding of terrorism and money laundering activities, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act) requires all financial institutions to obtain, verify and record information that identifies each person or entity that opens an account.

For individual investors opening an account When you open an account, you will be asked for your name, residential address, date of birth and Social Security number.

For investors other than individuals When you open an account, you will be asked for the name of the entity, its principal place of business and taxpayer identification number (TIN) and may be requested to provide information on persons with authority or control over the account, such as name, residential address, date of birth and Social Security number. You may also be asked to provide documents, such as articles of incorporation, trust instruments or partnership agreements and other information that will help Signature Services identify the entity. Please see the Mutual Fund Account Application for more details.

Buying shares

Opening an account

By check

- Make out a check for the investment amount, payable to "John Hancock Signature Services, Inc."
- Deliver the check and your completed application to your financial representative or mail them to Signature Services (address below).

By exchange

- Call your financial representative or Signature Services to request an exchange.

By wire

- Deliver your completed application to your financial representative or mail it to Signature Services.
- Obtain your account number by calling your financial representative or Signature Services.
- Obtain wiring instructions by calling Signature Services.
- Instruct your bank to wire the amount of your investment. Specify the fund name, the share class, your account number and the name(s) in which the account is registered. Your bank may charge a fee to wire funds.

By Internet

- See "By exchange" and "By wire."

By phone

- See "By exchange" and "By wire."

Adding to an account

- Make out a check for the investment amount, payable to "John Hancock Signature Services, Inc."
- Fill out the detachable investment slip from an account statement. If no slip is available, include a note specifying the fund name, the share class, your account number and the name(s) in which the account is registered.
- Deliver the check and your investment slip or note to your financial representative, or mail them to Signature Services (address below).

- Log on to the Web site below to process exchanges between funds.
- Call EASI-Line for automated service.
- Call your financial representative or Signature Services to request an exchange.

- Obtain wiring instructions by calling Signature Services.
- Instruct your bank to wire the amount of your investment. Specify the fund name, the share class, your account number and the name(s) in which the account is registered. Your bank may charge a fee to wire funds.

- Verify that your bank or credit union is a member of the Automated Clearing House (ACH) system.
- Complete the "Bank information" section on your account application.
- Log on to the Web site below to initiate purchases using your authorized bank account.

- Verify that your bank or credit union is a member of the ACH system.
- Complete the "To purchase, exchange or redeem shares via telephone" and "Bank information" sections on your account application.
- Call EASI-Line for automated service.
- Call your financial representative or call Signature Services between 8:00 A.M. and 7:00 P.M., Eastern Time, on most business days.

To add to an account using the Monthly Automatic Accumulation Program, see "Additional investor services."

Selling shares

To sell some or all of your shares

By letter

- Accounts of any type.
- Sales of any amount.
- Write a letter of instruction or complete a stock power indicating the fund name, the share class, your account number, the name(s) in which the account is registered and the dollar value or number of shares you wish to sell.
- Include all signatures and any additional documents that may be required (see next page).
- Mail the materials to Signature Services (address below).
- A check will be mailed to the name(s) and address in which the account is registered, or otherwise according to your letter of instruction.

By Internet

- Most accounts.
- Sales of up to \$100,000.
- Log on to the Web site below to initiate redemptions from your fund.

By phone

- Most accounts.
- Sales of up to \$100,000.
- Call EASI-Line for automated service.
- Call your financial representative or call Signature Services between 8:00 A.M. and 7:00 P.M., Eastern Time, on most business days.

By wire or electronic funds transfer (EFT)

- Requests by letter to sell any amount.
- Requests by Internet or phone to sell up to \$100,000.
- To verify that the Internet or telephone redemption privilege is in place on an account, or to request the form to add it to an existing account, call Signature Services.
- Funds requested by wire will generally be wired the next business day. A \$4 fee will be deducted from your account. Your bank may also charge you a fee for this service.
- Funds requested by EFT are generally available by the second business day. Your bank may charge you a fee for this service.

By exchange

- Accounts of any type.
- Sales of any amount.
- Obtain a current prospectus for the fund into which you are exchanging by accessing the fund's Web site by Internet, or by calling your financial representative or Signature Services.
- Log on to the Web site below to process exchanges between your funds.
- Call EASI-Line for automated service.
- Call your financial representative or Signature Services to request an exchange.

To sell shares through a systematic withdrawal plan, see "Additional investor services."

Selling shares in writing

In certain circumstances, you will need to make your request to sell shares in writing. You may need to include additional items with your request, unless they were previously provided to Signature Services and are still accurate. These items are shown in the table below. You may also need to include a signature guarantee, which protects you against fraudulent orders. You will need a signature guarantee if:

- your address of record has changed within the past 30 days;
- you are selling more than \$100,000 worth of shares and are requesting payment by check (this requirement is waived for certain

entities operating under a signed fax trading agreement with John Hancock); or

- you are requesting payment other than by a check mailed to the address/bank of record and payable to the registered owner(s).

You will need to obtain your signature guarantee from a member of the Signature Guarantee Medallion Program. Most broker-dealers, banks, credit unions and securities exchanges are members of this program. A notary public CANNOT provide a signature guarantee.

Seller	Requirements for written requests
Owners of individual, joint or UGMA/UTMA accounts (custodial accounts for minors)	<ul style="list-style-type: none"> • Letter of instruction. • On the letter, the signatures and titles of all persons authorized to sign for the account, exactly as the account is registered. • Medallion signature guarantee, if applicable (see above).
Owners of corporate, sole proprietorship, general partner or association accounts	<ul style="list-style-type: none"> • Letter of instruction. • Corporate business/organization resolution, certified within the past 12 months, or a John Hancock funds business/organization certification form. • On the letter and the resolution, the signature of the person(s) authorized to sign for the account. • Medallion signature guarantee, if applicable (see above).
Owners or trustees of trust accounts	<ul style="list-style-type: none"> • Letter of instruction. • On the letter, the signature(s) of the trustee(s). • Copy of the trust document, certified within the past 12 months, or a John Hancock funds trust certification form. • Medallion signature guarantee, if applicable (see above).
Joint tenancy shareholders with rights of survivorship with a deceased co-tenant(s)	<ul style="list-style-type: none"> • Letter of instruction signed by surviving tenant. • Copy of death certificate. • Medallion signature guarantee, if applicable (see above). • Inheritance tax waiver, if applicable.
Executors of shareholder estates	<ul style="list-style-type: none"> • Letter of instruction signed by executor. • Copy of order appointing executor, certified within the past 12 months. • Medallion signature guarantee, if applicable (see above). • Inheritance tax waiver, if applicable.
Administrators, conservators, guardians and other sellers or account types not listed above	<ul style="list-style-type: none"> • Call Signature Services for instructions.

Transaction policies

Valuation of shares

Calculation of NAV

The NAV for each class of shares of the fund is determined once daily as of the close of regular trading of the New York Stock Exchange (NYSE) (typically 4:00 p.m., Eastern Standard Time) on each business day that the NYSE is open. On holidays or other days when the NYSE is closed, the NAV is not calculated and the fund does not transact purchase or redemption requests. The time at which shares are priced and until which purchase and redemption orders are accepted may be changed as permitted by the Securities and Exchange Commission.

Each class of shares of the fund has its own NAV, which is computed by dividing the total assets, minus liabilities, allocated to each share class by the number of fund shares outstanding for that class.

Valuation of Securities

Except as noted below, securities held by a fund are primarily valued on the basis of market quotations or official closing prices. Certain short-term debt instruments are valued on the basis of amortized cost. Shares of other open-end investment companies held by a fund are valued based on the NAVs of those investment companies.

Fair Valuation of Securities. If market quotations or official closing prices are not readily available or do not accurately reflect fair value for a security, or if a security's value has been materially affected by events occurring before the fund's pricing time but after the close of the exchange or market on which the security is principally traded, the security will be valued at its fair value as determined in good faith by the Trustees. The Trustees have delegated the responsibility to fair value securities to the fund's Pricing Committee, and the actual calculation of a security's fair value may be made by persons acting pursuant to the direction of the Trustees.

In deciding whether to fair value a security, the fund's Pricing Committee may review a variety of factors, including:

in the case of foreign securities:

- developments in foreign markets,
- the performance of U.S. securities markets after the close of trading in the market, and
- the performance of instruments trading in U.S. markets that represent foreign securities or baskets of foreign securities.

in the case of fixed income securities:

- actions by the Federal Reserve Open Market Committee and other significant trends in U.S. fixed-income markets.

in the case of all securities:

- political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded,
- announcements relating to the issuer of the security concerning matters such as trading suspensions, acquisitions, recapitalizations, litigation developments, a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry, and
- events affecting the securities markets in general (such as market disruptions or closings and significant fluctuations in U.S. and/or foreign markets).

Fair value pricing of securities is intended to help ensure that a fund's NAV reflects the fair market value of the fund's portfolio securities as of the close of regular trading on the NYSE (as opposed to a value that is

no longer reflects market value as of such close), thus limiting the opportunity for aggressive traders or market timers to purchase shares of the fund at deflated prices reflecting stale security valuations and promptly sell such shares at a gain thereby diluting the interests of long-term shareholders. However, a security's valuation may differ depending on the method used for determining value, and no assurance can be given that fair value pricing of securities will successfully eliminate all potential opportunities for such trading gains. The use of fair value pricing has the effect of valuing a security based upon the price the fund might reasonably expect to receive if it sold that security in an orderly transaction between market participants but does not guarantee that the security can be sold at the fair value price. Further, because of the inherent uncertainty and subjective nature of fair valuation, a fair valuation price may differ significantly from the value that would have been used had a readily available market price for the investment existed, and these differences could be material. With respect to any portion of a fund's assets that is invested in other open-end investment companies, that portion of the fund's NAV is calculated based on the NAV of that investment company. The prospectus for the other investment company explains the circumstances and effects of fair value pricing for that other investment company.

If the fund has portfolio securities that are primarily listed on foreign exchanges that trade on weekends or other days when the fund does not price its shares, the NAV of the fund's shares may change on days when shareholders will not be able to purchase or redeem the fund's shares.

Buy and sell prices

When you buy shares, you pay the NAV, plus any applicable sales charges, as described earlier. When you sell shares, you receive the NAV, minus any applicable deferred sales charges.

Execution of requests

The fund is open on those days when the NYSE is open, typically Monday through Friday. Buy and sell requests are executed at the next NAV to be calculated after Signature Services receives your request in good order. In unusual circumstances, the fund has the right to redeem in kind.

At times of peak activity, it may be difficult to place requests by telephone. During these times, consider using EASI-Line, accessing www.jhfunds.com or sending your request in writing.

In unusual circumstances, the fund may temporarily suspend the processing of sell requests or may postpone payment of proceeds for up to three business days or longer, as allowed by federal securities laws.

Telephone transactions

For your protection, telephone requests may be recorded in order to verify their accuracy. Also for your protection, telephone redemption transactions are not permitted on accounts in which names or mailing addresses have changed within the past 30 days. Proceeds from telephone transactions can only be mailed to the address of record.

Exchanges

You may exchange shares of a class of the fund for shares of the same class of any other John Hancock fund that is then offering that class, generally without paying any additional sales charges, except if you are exchanging into a fund with a higher sales charge. The registration for both accounts must be identical.

Class B and Class C shares will continue to age from the original date and will retain the same CDSC rate. A CDSC rate that has increased will drop again with a future exchange into a fund with a lower rate. A fund may cancel or change its exchange policies at any time upon

60 days' written notice to its shareholders. For further details, see "Additional services and programs" in the SAI (see the back cover of this prospectus).

Excessive trading

The fund is intended for long-term investment purposes only and does not knowingly accept shareholders who engage in market timing or other types of excessive short-term trading. Short-term trading into and out of the fund can disrupt portfolio investment strategies and may increase fund expenses for all shareholders, including long-term shareholders who do not generate these costs.

Right to reject or restrict purchase and exchange orders

Purchases and exchanges should be made primarily for investment purposes. The fund reserves the right to restrict, reject or cancel (with respect to cancellations within one day of the order), for any reason and without any prior notice, any purchase or exchange order, including transactions representing excessive trading and transactions accepted by any shareholder's financial intermediary. For example, the fund may, in its discretion, restrict, reject or cancel a purchase or exchange order even if the transaction is not subject to a specific "Limitation on exchange activity," as described below, if the fund or its agent determines that accepting the order could interfere with the efficient management of the fund's portfolio, or otherwise not be in the fund's best interest in light of unusual trading activity related to your account. In the event that the fund rejects or cancels an exchange request, neither the redemption nor the purchase side of the exchange will be processed. If you would like the redemption request to be processed even if the purchase order is rejected, you should submit separate redemption and purchase orders rather than placing an exchange order. The fund reserves the right to delay for up to one business day, consistent with applicable law, the processing of exchange requests in the event that, in the fund's judgment, such delay would be in the fund's best interest, in which case both the redemption and purchase side of the exchange will receive the fund's NAV at the conclusion of the delay period. The fund, through its agents in their sole discretion, may impose these remedial actions at the account holder level or the underlying shareholder level.

Exchange limitation policies

The Board of Trustees has adopted the following policies and procedures by which the fund, subject to the limitations described below, takes steps reasonably designed to curtail excessive trading practices.

Limitation on exchange activity

The fund or its agent may reject or cancel a purchase order, suspend or terminate the exchange privilege, or terminate the ability of an investor to invest in John Hancock funds if the fund or its agent determines that a proposed transaction involves market timing or disruptive trading that it believes is likely to be detrimental to the fund. The fund or its agent cannot ensure that it will be able to identify all cases of market timing or disruptive trading, although it attempts to have adequate procedures in place to do so. The fund or its agent may also reject or cancel any purchase order (including an exchange) from an investor or group of investors for any other reason. Decisions to reject or cancel purchase orders (including exchanges) in the fund are inherently subjective and will be made in a manner believed to be in the best interest of the fund's shareholders. The fund does not have any arrangement to permit market timing or disruptive trading.

Exchanges made on the same day in the same account are aggregated for purposes of counting the number and dollar amount of exchanges made by the account holder. The exchange limits referenced above will not be imposed or may be modified under certain circumstances. For

example, these exchange limits may be modified for accounts held by certain retirement plans to conform to plan exchange limits, ERISA considerations or Department of Labor regulations. Certain automated or pre-established exchange, asset-allocation and dollar-cost-averaging programs are not subject to these exchange limits. These programs are excluded from the exchange limitation since the fund believes that they are advantageous to shareholders and do not offer an effective means for market timing or excessive trading strategies. These investment tools involve regular and predetermined purchase or redemption requests made well in advance of any knowledge of events affecting the market on the date of the purchase or redemption.

These exchange limits are subject to the fund's ability to monitor exchange activity, as discussed under "Limitation on the ability to detect and curtail excessive trading practices" below. Depending upon the composition of the fund's shareholder accounts, and in light of the limitations on the ability of the fund to detect and curtail excessive trading practices, a significant percentage of the fund's shareholders may not be subject to the exchange limitation policy described above. In applying the exchange limitation policy, the fund considers information available to it at the time and reserves the right to consider trading activity in a single account or multiple accounts under common ownership, control or influence.

Limitation on the ability to detect and curtail excessive trading practices

Shareholders seeking to engage in excessive trading practices sometimes deploy a variety of strategies to avoid detection and, despite the efforts of the fund to prevent excessive trading, there is no guarantee that the fund or its agent will be able to identify such shareholders or curtail their trading practices. The ability of the fund and its agent to detect and curtail excessive trading practices may also be limited by operational systems and technological limitations. Because the fund will not always be able to detect frequent trading activity, investors should not assume that the fund will be able to detect or prevent all frequent trading or other practices that disadvantage the fund. For example, the ability of the fund to monitor trades that are placed by omnibus or other nominee accounts is severely limited in those instances in which the financial intermediary, including a financial adviser, broker, retirement plan administrator or fee-based program sponsor, maintains the records of the fund's underlying beneficial owners. Omnibus or other nominee account arrangements are common forms of holding shares of the fund, particularly among certain financial intermediaries such as financial advisers, brokers, retirement plan administrators or fee-based program sponsors. These arrangements often permit the financial intermediary to aggregate its clients' transactions and ownership positions and do not identify the particular underlying shareholder(s) to the fund. However, the fund will work with financial intermediaries as necessary to discourage shareholders from engaging in abusive trading practices and to impose restrictions on excessive trades. In this regard, the fund has entered into information-sharing agreements with financial intermediaries pursuant to which these intermediaries are required to provide to the fund, at the fund's request, certain information relating to their customers investing in the fund through omnibus or other nominee accounts. The fund will use this information to attempt to identify excessive trading practices. Financial intermediaries are contractually required to follow any instructions from the fund to restrict or prohibit future purchases from shareholders that are found to have engaged in excessive trading in violation of the fund's policies. The fund cannot guarantee the accuracy of the information provided to it from financial intermediaries and so cannot ensure that it will be able to detect abusive trading practices that occur through omnibus or other nominee accounts. As a consequence, the fund's ability to monitor and discourage excessive trading practices in these types of accounts may be limited.

Excessive trading risk

To the extent that the fund or its agent is unable to curtail excessive trading practices in the fund, these practices may interfere with the efficient management of the fund's portfolio and may result in the fund engaging in certain activities to a greater extent than it otherwise would, such as maintaining higher cash balances, using its line of credit and engaging in increased portfolio transactions. Increased portfolio transactions and use of the line of credit would correspondingly increase the fund's operating costs and decrease the fund's investment performance. Maintenance of higher levels of cash balances would likewise result in lower fund investment performance during periods of rising markets.

While excessive trading can potentially occur in the fund, certain types of funds are more likely than others to be targets of excessive trading. For example:

- A fund that invests a significant portion of its assets in *small- or mid-capitalization stocks or securities* in particular industries that may trade infrequently or are fair valued as discussed under "Valuation of shares," entails a greater risk of excessive trading, as investors may seek to trade fund shares in an effort to benefit from their understanding of the value of those types of securities (referred to as price arbitrage).
- A fund that invests a material portion of its assets in *securities of non-U.S. issuers* may be a potential target for excessive trading if investors seek to engage in price arbitrage based upon general trends in the securities markets that occur subsequent to the close of the primary market for such securities.
- A fund that invests a significant portion of its assets in *below investment-grade (junk) bonds* that may trade infrequently or are fair valued as discussed under "Valuation of shares," incurs greater risk of excessive trading, as investors may seek to trade fund shares in an effort to benefit from their understanding of the value of those types of securities (referred to as price arbitrage).

Any frequent trading strategies may interfere with efficient management of a fund's portfolio and raise costs. A fund that invests in the types of securities discussed above may be exposed to this risk to a greater degree than a fund that invests in highly liquid securities. These risks would be less significant, for example, in a fund that primarily invests in U.S. government securities, money market instruments, investment-grade corporate issuers or large-capitalization U.S. equity securities. Any successful price arbitrage may cause dilution in the value of the fund shares held by other shareholders.

Account information

The fund is required by law to obtain information for verifying an account holder's identity. For example, an individual will be required to supply his or her name, residential address, date of birth and Social Security number. If you do not provide the required information, we may not be able to open your account. If verification is unsuccessful, the fund may close your account, redeem your shares at the next NAV minus any applicable sales charges and take any other steps that it deems reasonable.

Certificated shares

The fund no longer issues share certificates. Shares are electronically recorded. Any existing certificated shares can only be sold by returning the certificated shares to Signature Services, along with a letter of instruction or a stock power and a signature guarantee.

Sales in advance of purchase payments

When you place a request to sell shares for which the purchase money has not yet been collected, the request will be executed in a timely

fashion, but the fund will not release the proceeds to you until your purchase payment clears. This may take up to ten business days after the purchase.

Dividends and account policies

Account statements

In general, you will receive account statements as follows:

- after every transaction (except a dividend reinvestment, automatic investment or systematic withdrawal) that affects your account balance
- after any changes of name or address of the registered owner(s)
- in all other circumstances, every quarter

Every year you should also receive, if applicable, a Form 1099 tax information statement, mailed by January 31.

Dividends

The fund generally declares dividends daily and pays them monthly. Capital gains, if any, are distributed annually, typically after the end of the fund's fiscal year. Most of the fund's dividends are income dividends. Your dividends begin accruing the day after the fund receives payment and continues through the day your shares are actually sold.

Dividend reinvestments

Most investors have their dividends reinvested in additional shares of the same class of the same fund. If you choose this option, or if you do not indicate any choice, your dividends will be reinvested. Alternatively, you may choose to have your dividends and capital gains sent directly to your bank account or a check may be mailed if your combined dividend and capital gains amount is \$10 or more. However, if the check is not deliverable or the combined dividend and capital gains amount is less than \$10, your proceeds will be reinvested. If five or more of your dividend or capital gains checks remain uncashed after 180 days, all subsequent dividends and capital gains will be reinvested. No front-end sales charge or CDSC will be imposed on shares derived from reinvestment of dividends or capital gains distributions.

Taxability of dividends

For investors who are not exempt from federal income taxes, dividends you receive from the fund, whether reinvested or taken as cash, are generally considered taxable. Dividends from the fund's short-term capital gains are taxable as ordinary income. Dividends from the fund's long-term capital gains are taxable at a lower rate. Whether gains are short-term or long-term depends on the fund's holding period. Some dividends paid in January may be taxable as if they had been paid the previous December.

The Form 1099 that is mailed to you every January, if applicable, details your dividends and their federal tax category, although you should verify your tax liability with your tax professional.

Returns of capital

If the fund's distributions exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made in the same taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the fund and result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

Taxability of transactions

Any time you sell or exchange shares, it is considered a taxable event for you if you are not exempt from federal income taxes. Depending on the purchase price and the sale price of the shares you sell or exchange, you may have a gain or a loss on the transaction. You are responsible for any tax liabilities generated by your transactions.

Small accounts

If the value of your account is less than \$2,500, you may be asked to purchase more shares within 30 days. If you do not take action, the fund may close out your account and mail you the proceeds. Alternatively, the fund may charge you \$20 a year to maintain your account. You will not be charged a CDSC if your account is closed for this reason.

Additional investor services

Monthly Automatic Accumulation Program

MAAP lets you set up regular investments from paychecks or bank accounts to the John Hancock fund(s). Investors determine the frequency and amount of investments (\$25 minimum per month), and they can terminate the program at any time. To establish, you must satisfy the minimum initial investment requirements specified in the section "Opening an account" and complete the appropriate parts of the account application.

Systematic withdrawal plan

This plan may be used for routine bill payments or periodic withdrawals from your account. To establish:

- Make sure you have at least \$5,000 worth of shares in your account.
- Make sure you are not planning to invest more money in this account (buying shares during a period when you are also selling shares of the same fund is not advantageous to you because of sales charges).
- Specify the payee(s). The payee may be yourself or any other party, and there is no limit to the number of payees you may have, as long as they are all on the same payment schedule.
- Determine the schedule: monthly, quarterly, semiannually, annually or in certain selected months.
- Fill out the relevant part of the account application. To add a systematic withdrawal plan to an existing account, contact your financial representative or Signature Services.

Retirement plans

John Hancock funds offers a range of retirement plans, including traditional and Roth IRAs, Coverdell ESAs, SIMPLE plans and SEPs. Using these plans, you can invest in any John Hancock fund (except tax-free income funds). To find out more, call Signature Services at 1-800-225-5291.

John Hancock funds do not accept requests to establish new John Hancock custodial 403(b)(7) accounts; do not accept requests for exchanges or transfers into your existing John Hancock custodial 403(b)(7) accounts; and require additional disclosure documentation if you direct John Hancock funds to exchange or transfer some or all of your John Hancock custodial 403(b)(7) account assets to another 403(b)(7) contract or account. In addition, the fund no longer accepts salary deferrals into 403(b)(7) accounts. Please refer to the SAI for more information regarding these restrictions.

Disclosure of fund holdings

The fund's policy regarding disclosure of portfolio holdings can be found in the SAI and the portfolio holdings information can be found at www.jhfunds.com.

The following information for the fund is posted on the Web site, generally on the fifth business day after month end: top ten holdings; top ten sector analysis; total return/yield; top ten countries; average quality/maturity; beta/alpha; and top ten portfolio composition. The holdings of the fund will be posted to the Web site within 15 days after each calendar month end. The holdings of the fund are also disclosed quarterly to the SEC on Form N-Q as of the end of the first and third quarters of the fund's fiscal year and on Form N-CSR as of the second and fourth quarters of the fund's fiscal year.

For more information

Two documents are available that offer further information on the fund:

Annual/Semiannual report to shareholders

Includes financial statements, a discussion of the market conditions and investment strategies that significantly affected performance, as well as the auditors' report (in annual report only).

Statement of Additional Information (SAI)

The SAI contains more detailed information on all aspects of the fund, and includes a summary of the fund's policy regarding disclosure of its portfolio holdings, as well as legal and regulatory matters. A current SAI has been filed with the SEC and is incorporated by reference into (and is legally a part of) this prospectus.

To obtain a free copy of these documents

There are several ways you can get a current annual/semiannual report, prospectus or SAI from John Hancock:
