REIT Real Estate Investment Trust

(I) Non-income producing security.

(L) All or a portion of this security is on loan as of November 30, 2009.

(W) Investment is an affiliate of the Fund, the adviser and/or subadviser.

(Y) The investment represents the investment of securities lending collateral and the rate shown is the annualized seven-day yield as of November 30, 2009..

† At November 30, 2009, the aggregate cost of investment securities for federal income tax purposes was \$55,715,642. Net unrealized appreciation aggregated \$1,018,998, of which \$1,343,238 related to appreciated investment securities and \$324,240 related to depreciated investment securities.

* Yield represents either the annualized yield at the date of purchase, the stated coupon rate or, for floating rate securities, the rate at period end

Notes to the Schedule of Investments (Unaudited)

Security valuation

Investments are stated at value as of the close of the regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. Debt obligations are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied quotes and electronic data processing techniques, which take into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Equity and debt obligations, for which there are no prices available from an independent pricing service, are valued based on bid quotations or evaluated prices, as applicable, obtained from broker-dealers or fair valued as described below. Certain short-term debt investments are valued at amortized cost. John Hancock Collateral Investment Trust (JHCIT), an affiliated registered investment company managed by MFC Global Investment Management (U.S.), LLC, a subsidiary of MFC, is valued at its net asset value each business day. JHCIT is a floating rate fund investing in money market investments as part of the securities lending program.

Other assets and securities where market quotations are not readily available are valued at fair value as determined in good faith by the Fund's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees.

Fair value measurements

The Fund uses a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs and the valuation techniques used are summarized below:

Level 1 — Exchange-traded prices in active markets for identical securities.

Level 2 — Prices determined using significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these techniques are received from independent pricing vendors and are based on an evaluation of the inputs described.

Level 3 — Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Fund's Pricing Committee's own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available. Securities using this technique are generally thinly traded or privately placed, and may be valued using broker quotes, which may include the use of the brokers' own judgments about the assumptions that market participants would use.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of November 30, 2009, by major security category or security type. Other financial instruments are derivative

instruments not reflected in the Portfolio of Investments, such as futures and forwards contracts, which are stated at market value.

	Total Market Value at 11/30/09	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Common Stocks

Total Assets	\$ 56,747,690	\$ 54,566,690	\$ 2,181,000	—

Repurchase agreements

The Fund may enter into repurchase agreements. When the Fund enters into a repurchase agreement through its custodian, it receives delivery of securities, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the market value is generally at least 102% of the repurchase amount. The Fund will take receipt of all securities underlying the repurchase agreements it has entered into until such agreements expire. If the seller defaults, the Fund would suffer a loss to the extent that proceeds from the sale of underlying securities were less than the repurchase amount. The Fund may enter into repurchase agreements maturing within seven days with domestic dealers, banks or other financial institutions deemed to be creditworthy by the Adviser.

Securities lending

The Fund may lend portfolio securities from time to time in order to earn additional income. The Fund retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends associated with securities and to participate in any changes in their value. On the settlement date of the loan, the Fund receives cash collateral against the loaned securities and maintains the cash collateral in an amount no less than the market value of the loaned securities.

The market value of the loaned securities is determined at the close of business of the Fund. Any additional required cash collateral is delivered to the Fund or excess collateral is returned to the borrower on the next business day. Cash collateral received is invested in JHCIT. JHCIT is not a stable value fund and thus the Fund receives the benefit of any gains and bears any losses generated by JHCIT.

The Fund may receive compensation for lending their securities either in the form of fees, and/or by retaining a portion of interest on the investment of any cash received as collateral. If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund could experience delays and costs in recovering the securities loaned or in gaining access to the collateral. The Fund bears the risk in the event that invested collateral is not sufficient to meet obligations due on loans.

Financial Instruments

Futures

The Fund may purchase and sell financial futures contracts, including index futures and options on these contracts. A future is a contractual agreement to buy or sell a particular commodity, currency, or financial instrument at a pre-determined price in the future. For more information on futures, please refer to the Fund's prospectus, semiannual and annual reports.

During the period ended November 30, 2009, the Fund used futures to gain exposure to certain securities markets and to maintain the diversity of the portfolio. The following summarizes the Fund's use of futures contracts and the contracts held as of November 30, 2009:

Open Contracts	Number of Contracts	Position	Expiration Date	Notional Value	Unrealized Appreciation (Depreciation)
Russell 2000 Mini Index Futures	15	Long	Dec 2009	\$868,800	\$8,250
S&P Mid 400 E-mini Index Futures	15	Long	Dec 2009	1,026,000	4,800
				\$1,894,800	\$13,050

Future contracts (USD notional amounts) ranged from approximately \$1.8 million to \$1.9 million for the three-month period ended November 30, 2009.

Fair value of derivative instruments by risk category

The table below summarizes the fair values of derivatives held by the Fund at November 30, 2009 by risk category:

	Financial instruments location	Asset Derivatives Fair Value	Liability Derivatives Fair Value	
Interest rate contracts	Receivable for futures variation margin; Net unrealized appreciation (depreciation) on investments	Futures	\$13,050	-
Total			\$13,050	\$ -
