Notes to Portfolio of Investments (unaudited)

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. The John Hancock Lifestyle Portfolios (the Portfolios) use a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities, including registered investment companies. Level 2 includes securities valued using significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the Portfolios' own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

As of September 30, 2011, all investments for the Portfolios are categorized as Level 1 under the hierarchy described above. Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. During the nine months ended September 30, 2011, there were no significant transfers in or out of Level 1 assets.

Investments by the Portfolios in underlying affiliated funds and/or other investment companies are valued at their respective net asset values each business day.

Cost of Investment Securities for Federal Income Tax Purposes

The tax cost of investments owned on September 30, 2011, was as follows:

Portfolio	Aggregate Cost	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation/ (Depreciation)
Lifestyle Aggressive	\$3,393,216,253	\$39,037,474	(\$132,355,486)	(\$93,318,012)
Lifestyle Growth	10,413,186,634	127,602,968	(367,494,765)	(239,891,797)
Lifestyle Balanced	10,648,728,908	174,416,633	(189,676,537)	(15,259,904)
Lifestyle Moderate	3,496,084,454	100,639,948	(85,640,359)	14,999,589
Lifestyle Conservative	3,083,522,379	61,705,942	(39,095,726)	22,610,216
